Projekte (6)

Smartphone-Enabled Detection of COugh in COvid-19 (COCO): An Exploratory, Single-Center, Observational Cohort Study

Klinische Forschung - 03.12.2020 - 03.12.2020

Automatisch geschlossen

COugh During and after acute EXacerbation of chronic obstructive pulmonary disease (CODEX) study

Klinische Forschung - 08.09.2020 - 01.07.2021

Automatisch geschlossen

The role of physical activity, malnutrition and sarcopenia for the prediction of acute exacerbations and the evolution of COPD assessment test (CAT) in patients with COPD

Klinische Forschung - 29.11.2018 - 30.06.2021

Abgeschlossen

Asthma control Prediction

Klinische Forschung - 01.02.2018 - 31.12.2018

Automatisch geschlossen

A randomised controlled, international, multicentre crossover trial. We want to test, whether telehealthcare can improve HRQOL and reduce emergency admissions and hospitalisations due to AECOPD

Klinische Forschung - 11.05.2016 - 31.12.2018

Automatisch geschlossen

Clinical impact of multiplex realtime PCR in respiratory tract infections

Klinische Forschung - 15.11.2014 - 31.12.2015

Automatisch geschlossen
