Publications (5)

Trepp R, Padberg B, Varga Z, Cathomas R, Inauen R, Reinhart W. Extensive extranodal metastases of basal-like breast cancer with predominant myoepithelial spindle cell differentiation. *Pathology, research and practice* 2009

Inauen R, Ruhstaller T. Adenokarzinome des Oesophagus und des Magens: Vergleichende Epidemiologie mit markanten Unterschieden. *Onkologie* 2009; 1:6-7.

Inauen R, Ruhstaller T. Magen- und gastroösophageales Uebergangskarzinom: Diagnostik und Therapieoptionen des frühen bis metastasierten Tumorstadiums. *Onkologie* 2009; 1:8-13.

von Moos R, Caspar C, Thürlimann B, Angst R, Inauen R, Greil R, Bergstrom B, Schmieding K, Pecherstorfer M. Renal safety profiles of ibandronate 6 mg infused over 15 and 60 min: a randomized, open-label study. *Ann Oncol* 2008; 19:1266-70.

Inauen R, Cathomas R, Boehm T, Pestalozzi B, Gillessen Sommer S, von Moos R. Feasibility of using cetuximab and bevacizumab in a patient with colorectal cancer and terminal renal failure. *Oncology* 2007; 72:209-10.

Projects (7)

International, multicenter, open-label, phase II study to investigate the efficacy and safety of multiple doses of IMAB362 in patients with advanced adenocarcinoma of the stomach or the lower esophagus

Clinical Studies - Jan 26, 2011 - Jun 30, 2012

Completed

Capecitabine and Oxaliplatin prior and concurrent to preoperative pelvic radiotherapy in patients with locally advanced rectal cancer. A survival analysis

Clinical Studies - Jun 25, 2010 - Mar 31, 2011

Automatically Closed

Multimodal therapy with and without cetuximab in patients with locally advanced esophageal carcinoma. An open-label phase III trial

Clinical Studies - May 17, 2010 - Jan 31, 2013

Automatically Closed

Sorafenib alone or in combination with everolimus in patients with unresectable hepatocellular carcinoma. A randomized multicenter phase II trial

Clinical Studies - Oct 26, 2009 - Oct 31, 2011

Automatically Closed

FLOxTox: Assessment of the Polygenic Basis of Adverse Reactions to 5-Fluorouracil/Leucovorin/Oxaliplatin of Colorectal Cancer Patients Using a Pathway Approach

Clinical Studies - Aug 31, 2009 - Aug 31, 2011

Completed

Neoadjuvant radiotherapy combined with capecitabine and sorafenib in patients with advanced, K-ras mutated rectal cancer. A multicenter phase I/IIa trial

Clinical Studies - Mar 18, 2009 - Oct 30, 2011

Automatically Closed

Neoadjuvant radiotherapy and capecitabine with or without panitumumab in patients with advanced, K-ras unmutated rectal cancer: A randomized multicenter phase II trial

Clinical Studies - Feb 16, 2009 - Jul 1, 2011

Automatically Closed
